This site is located on the right-hand side of the road at the junction of two main exits from the Townsville Central Business District, approximately 5kms away. It is adjacent to the new North Queensland Stadium currently under construction, due to open in 2020. It faces traffic travelling into town from the Bruce Highway, South Townsville, and the southern suburbs. The site is mounted on a single pole and illuminated to ensure visibility to a large number of people in one of Queensland's largest regional centres.

Located directly opposite the new Townsville Stadium (opened February 2020)

Restrictions: No political, religious advertising; Tower access required
